

# **LATHEMAESTRO**

## **Rules and Regulations**

1. Objective: The objective of the competition is to design the given specimen using a lathe machine within the required time.
2. Data and resources: Participants may be provided with data and resources, such as 2D drawing specifications or physical parts, that they can use as reference to complete the competition.
3. Eligibility: The competition is open to individuals who are pursuing B-Tech in any Branch.
4. Tools and Apparatus Required: Lathe Machine, Cutting Tools etc.
5. Judging criteria: The judging criteria includes accuracy, completeness, speed and quality of the final model. The judges may also evaluate the methodology used by the participants to complete the competition.
6. Submission and deadlines: The participants are required to submit their final model by specified deadline. Late submission may not be accepted, and disqualifications may occur if rules and regulations are not followed.
7. Prize and recognition: The winner of the competition may be awarded prizes, such as cash or certificates, and may be recognized publicly through various media channels.
8. In the absence of at least five participants, the event will be cancelled.
